Status Indicators
There are four indicator lights in the upper right-hand corner of the UPS unit.

1. On/Off Switch: This indicator is used to power on and power off the UPS unit.

2. Battery Charge: This indicator shows the battery charge level. It is lit when the battery is fully charged.

3. Load Indicator: This indicator shows the load on the UPS. It is lit when the load is between 10% and 90% of the rated capacity.

4. Power Fault: This indicator shows a power fault. It is lit when there is a power line problem, such as a power outage or surge.

5. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

6. Error: This indicator shows an error. It is lit when there is an error, such as a battery fault or a power line problem.

7. Maintenance Bypass: This indicator shows the maintenance bypass mode. It is lit when the UPS is in bypass mode.

8. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

9. Battery Charge: This indicator shows the battery charge level. It is lit when the battery is fully charged.

10. Load Indicator: This indicator shows the load on the UPS. It is lit when the load is between 10% and 90% of the rated capacity.

11. Power Fault: This indicator shows a power fault. It is lit when there is a power line problem, such as a power outage or surge.

12. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

13. Error: This indicator shows an error. It is lit when there is an error, such as a battery fault or a power line problem.

14. Maintenance Bypass: This indicator shows the maintenance bypass mode. It is lit when the UPS is in bypass mode.

15. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

16. Battery Charge: This indicator shows the battery charge level. It is lit when the battery is fully charged.

17. Load Indicator: This indicator shows the load on the UPS. It is lit when the load is between 10% and 90% of the rated capacity.

18. Power Fault: This indicator shows a power fault. It is lit when there is a power line problem, such as a power outage or surge.

19. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

20. Error: This indicator shows an error. It is lit when there is an error, such as a battery fault or a power line problem.

21. Maintenance Bypass: This indicator shows the maintenance bypass mode. It is lit when the UPS is in bypass mode.

22. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

23. Battery Charge: This indicator shows the battery charge level. It is lit when the battery is fully charged.

24. Load Indicator: This indicator shows the load on the UPS. It is lit when the load is between 10% and 90% of the rated capacity.

25. Power Fault: This indicator shows a power fault. It is lit when there is a power line problem, such as a power outage or surge.

26. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

27. Error: This indicator shows an error. It is lit when there is an error, such as a battery fault or a power line problem.

28. Maintenance Bypass: This indicator shows the maintenance bypass mode. It is lit when the UPS is in bypass mode.

29. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

30. Battery Charge: This indicator shows the battery charge level. It is lit when the battery is fully charged.

31. Load Indicator: This indicator shows the load on the UPS. It is lit when the load is between 10% and 90% of the rated capacity.

32. Power Fault: This indicator shows a power fault. It is lit when there is a power line problem, such as a power outage or surge.

33. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

34. Error: This indicator shows an error. It is lit when there is an error, such as a battery fault or a power line problem.

35. Maintenance Bypass: This indicator shows the maintenance bypass mode. It is lit when the UPS is in bypass mode.

36. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

37. Battery Charge: This indicator shows the battery charge level. It is lit when the battery is fully charged.

38. Load Indicator: This indicator shows the load on the UPS. It is lit when the load is between 10% and 90% of the rated capacity.

39. Power Fault: This indicator shows a power fault. It is lit when there is a power line problem, such as a power outage or surge.

40. Transfer Switch: This indicator shows the transfer switch position. It is lit when the UPS is in bypass mode.

41. Error: This indicator shows an error. It is lit when there is an error, such as a battery fault or a power line problem.
